Important considerations

DNA testing relies on comparisons of the DNA of the parties being tested to the DNA of the general population. The test assumes that no individual related to the father being tested, could also be the father. Please notify us if this is not the case. DNA relationship testing will yield an informative answer for the analysis of mother-child-father relationships. It may not be as informative for other relationships. This will only be evident to the laboratory after testing has been completed.

How do I proceed with DNA testing?

- Complete **both** pages of this application form and post, email or fax to:
 DNALabs
 Locked Bag 145
 North Ryde NSW 1670 | E info@dnalabs.com.au | F +61 2 9855 5446
- On receipt of your application, a booking information pack will be sent to each person being tested in Australia. Each person can then book their own DNA collection appointment. The booking information pack includes an instruction letter and consent form (known as Form 2 - Affidavit).
- We will send a kit to the overseas doctor (or Immigration Office) for each person being tested overseas. If your test is for an immigration application, the Department of Immigration will arrange for an approved witness to attend the appointment.
- Once the collection appointment overseas is confirmed, Immigration will notify the people being tested. There will be an additional fee payable to the collecting doctor overseas. Clarification of this fee can be sought from the doctor prior to confirmation of the appointment.

Important considerations

DNA testing may result in unexpected outcomes with significant effect on persons tested. It may be useful to discuss the implications of the results for you and your family with a counsellor or legal professional before undergoing testing.
